C. Barnes	Associate Editor	H.A. Baskin	Printer
		E.G.Martin	Feature Editor

The Fourth of July

The Fourth is upon us again with its noise and hurly-burly. We are in the midst of a giddy whirl of excitement that has no equal on any other day of the year. There will be fireworks, picnics, watermelon cuttings, swimming parties and what have you. All the people from the country will be in town, and all the city folks will be out in the country. Everybody will have a good time or die before they will admit that they have been licked. In the midst of all this fun-seeking it behooves us to think of the safety of ourselves and others, in our celebrations. There is no other day in the year which shows so many casualties. Patriotism and martyrdom in a worthy cause are virtues of the highest; but loss of life and limb through carelessness or foolishness is never to be commended. So let us celebrate to the best of our ability, and keep the accident rate down.

Visitors

Captain LaGarde was here on Monday, on his regular tour of inspection. He left the same afternoon, everything being in good order.

More Forestry Trucks

The Forestry Truck drivers went to Tallahassee again this week, and brought back seven new Chevrolet pick-ups. It was reported by one of the drivers that considerable difficulty would have been experienced getting started if it hadn't been for the presence of the Kings duster.

Technician

The forestry personnel has acquired a new member this week also. He is Mr. L. W. Hill, Technical assisstant. Mr. Hill is a graduate of the University of Georgia. We hope that he will stay with us for a while as we would like to see more of him.

The Eternal Triangle!

Grim Tragedy stalks in Love Nest.

Company 1410 has been going on for months with no indication of the storm brewing in its very back yard. Across the fence in back of the company area there is a house or two where live some ladies and gentlemen of colour. And then with the roar of 45's and the shreiking of women the pot boiled over.

Water, Water, Everywhere-

In other words, where is all our water? It only makes one two three times this week that it the boys have had to do without there water. We suspect that it is not such a hardship on most of them to miss their daily bath; but if some of these rugged lads were to develop B. O. (Body Odor) wouldnt that be the luck? But when we miss the water most is when it gets so that there aint no water to drink. That's when it gets tough. We hear from the older boys that we were here in the beginning that it was really tough when they had to haul water for five or six miles, and bathe under an old pitcher-pump.

So maybe we aren't so bad-off after all If the pump only works every other day it will be fine. Maybe the pump is getting temperamental because they took its old master away. Maybe it's going on strike to get him back.

Prof Bell Goes To Fort Bragg.

Prof has been ordered to Ft Bragg, North Carolina, for two weeks in the Officers Reserve Corps there. He leaves Saturday and will be gone untill about the fifteenth of July, on leave. We hope that he enjoys his trip. We hear that Capt in Wilson, former C.O. of this company is in charge of a Company somewhere in that district. Prof says he will stop in and see him before he comes back, so maybe he will have some news for us.

EDUCATIONAL ASSISTANT

The Company has secured the assistance of an FERA teacher through the State Educational Adviser. His name is Mr. Raymond Vickery from the University of Florida at Gainesville. He is due to start courses Monday. He arrived Saturday night on the Mail truck. He will be stationed here for about eight or ten weeks to help Prof. Bell and establish some new courses.

NEWS FOR THE ROAD

The boys report that they have finally finished the road through San Pedro Bay. We know that they will be glad to get away from this project as they will probably get off from work a lot earlier. Hoover is the only one who will be sorry to leave. He will be lonesome for someplace in which to get stuck.

FT. BENNING

Kelley returned from Ft. Benning late Saturday Night, with his truck. He has been gone a week while his truck has been overhauled. With him were Johnny DeBerry and Patrick who have been taking the life-saving course at Benning. They are to accompany the cadre to the new camp and teach life saving there. They report that the men who have been transferred from this camp to Benning are doing well. They all say Hello to 1410.

HOSPITAL NEWS

Sick in Station Hospital at Ft. Benning:

Otto C. Gaines, Claude Steele, Fred Wallace, xxx

Sick in Quarters:

Emory Calhoun, Grover Robbins, Clarence McVey.

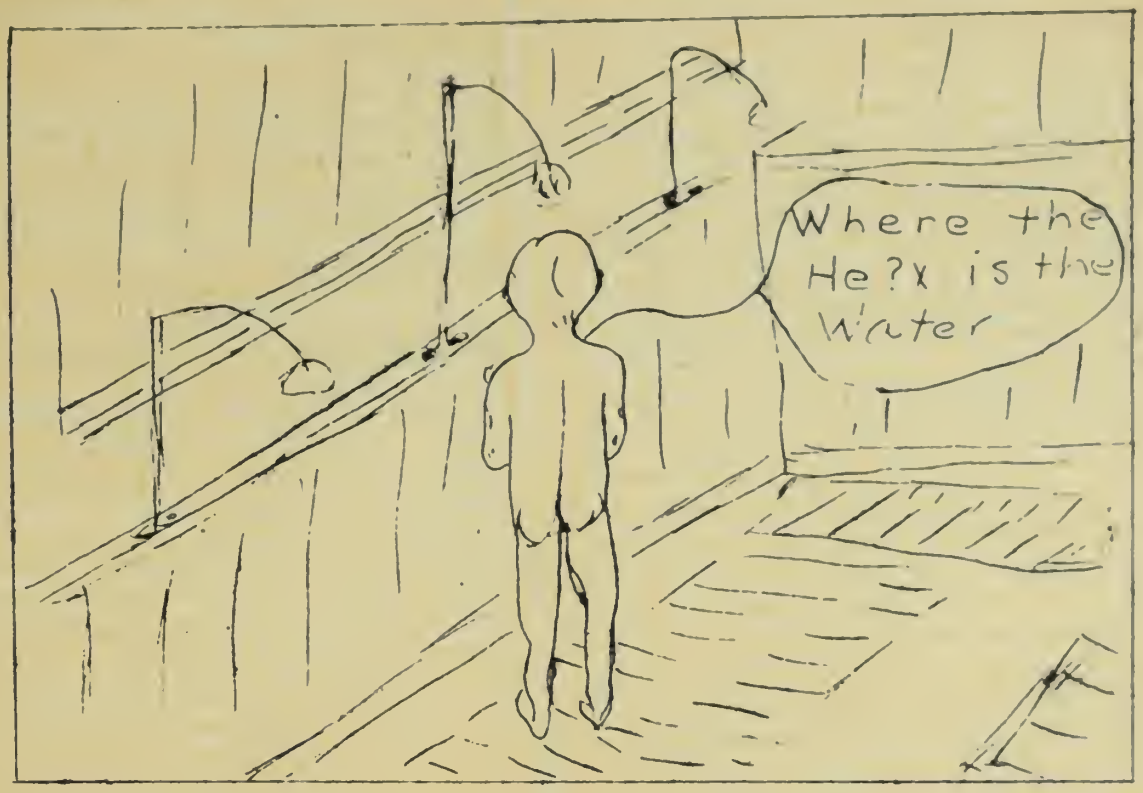
David Goary returned from Ft. Benning with Kelly on his return trip.

SPORT NOTES

The Baseball game with Cherry Lake in the middle of the week brought another winning streak to the Company. Cecil Smith made two out of three hits, and fanned thirteen men in seven innings. With Darris on base from a two bagger, Hoss Burns hit a double to bring in the winning run. The final score stood 4 to 5 with the Cherry Lake men on the short end.

A return game with Cherry Lake is scheduled for this Sunday at the Cherry Lake diamond.

The game with Quitman, Georgia turned out to be a drizzle after riding all morning to get there it started to rain in the fourth inning period. It had been raining all the time, but it got so bad they had to quit.



The Pump goes Haywire

The whole camp has been pretty much upset this week on account of the scanty water supply. Although this was hard on the old boys it was good luck for the new ones as it gave them their first trip off the grounds, when they were taken to the big lake to bathe and swim. A few who missed the truck walked over to the little lake and went in swimming there. The low supply of water was caused by a faulty pump jack and plunger. Mr. Schroeder said last night that he expected to have it fixed in the near future. ---Hooray!

We learn as we go to press that Mr. Schroeder has successfully completed the job and the pump has been running so much that it has gotten hot and all of the water it has been pumping has been steam instedd of water. This called for a process of condensation. That is why the water has been so warm the last few days.

We hear that one of the new boys received a G.I. bath in good fashion the other night when the pump decided to run for a change. Those G.I. brushed do their stuff at times when they are not polishing somebody's mess kit.

Boxing at Chery Lake

The matches at Cherry lake Friday night were enjoyed by everybody. Although our boys did not make such a good showing in the decisions, they did right p proud by us. Both Shirley and Baldy lose the decision to their opponents. Nick Fernandez' opponent crawfished on us. Baldy was matched against the Cherry Lakers white hope, and made an excellent showing. Baldy had the second round by a good margin. The other boy had a long l left that built up points for him, and our Baldy is a little light on his punches. If he can put some weight on those punches he can outrank that boy.

Shirley was in a tight spot. His man had the reach and the build on him. Shirley needs a lot of work, on his guard.

We will have a pretty good card next friday, and maybe show those boys something.

---- ----- ----

Discharged

Big Sam Maddox left on the Southland from Perry Saturday night for Bama. He was honorably discharged ~~to~~ at his own request to recieve employment.

Visitors

Willie Leaverett; former member of this company stopped in Sunday afternoon, with his wife and several other companions. We did not get to interview the boy but he seemed to be doing pretty good.

Schedule For Week of July 1

Monday:
4:00 Shorthand 6:00 Beginners
7:00 Spelling 9:00 Radio
Tuesday:
6;00 Beginners 7;00 Spanish
8;00 Current Events
Wednesday:
6:00 Beginners 7:00 Movie Films
9:00 Photography
Thursday:
4:00 Shorthand 7:00 Liberty Truck
8:00 Educational Films
Friday:
8:00 Forestry 6:00 Journalism
Saturday: (a.m.)
8:00 Woodworking and Journalism
N.B. Typing Class meets daily from 6-9:00 P.M.
Life Saving Wednesday and Saturday at Lake San Pelo

Diamond Ball

The diamond ball game with Perry was held on the same night as the Cherry Lake baseball game. So far as we know the game was a hard-fought, though losing battle. We will have more information about the next game.

The time has come,
The Walrus said,
To speak of many things.
Of shoes and ships
And sealing-wax
And cabbages and kings.
And why the sea is boiling hot,
And whether pigs have wings.

Suppose Pigs did have wings? How many of these C.C.C. guys do you suppose would be flying to the Mess Hall?
